

Compact FlexComfort

The ELACIN Compact FlexComfort is a compact hearing protector with a small handgrip, which makes it easy to fit the protector and remove it from the hearing canal.

It is standard manufactured from soft FlexFit materials (hardness 60 Shore) in clear transparent and comes with a cord and shirt clip.

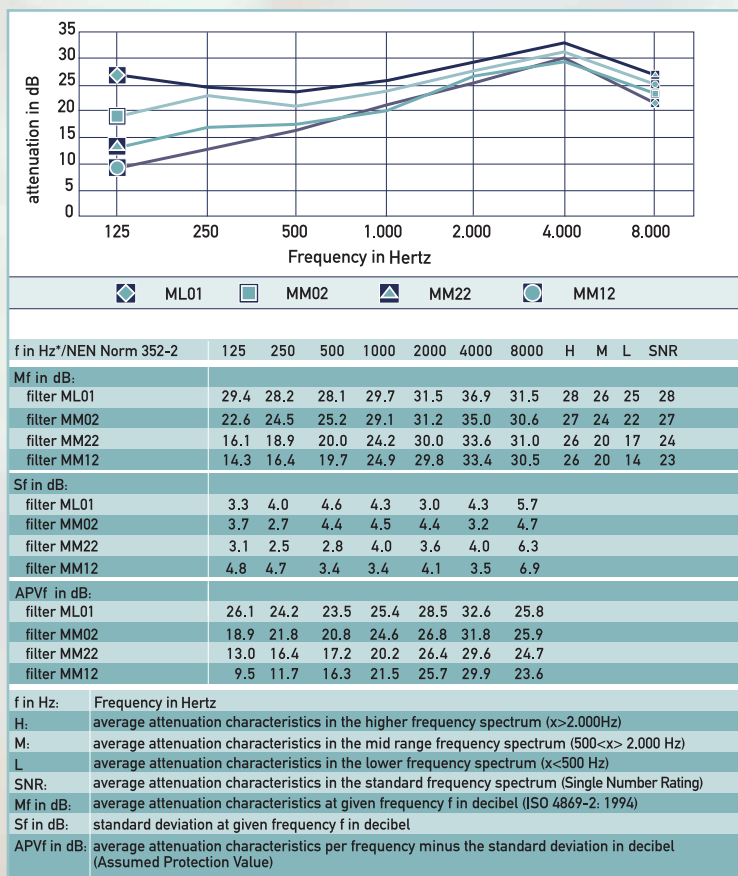

Another color is also possible. The Compact FlexComfort can be delivered in the colors red, blue, yellow, black, beige or transparent green.

Furthermore it will be supplied with one filter only; selection depends on the level of noise. You can choose between the ML01, MM02, MM22 or MM12 filter.

Applications of use

- Industrial surroundings
- Hunters
- Members of shooting galleries
- Do it yourselves
- Visitors to car and motorbike racing events
- And many more

Below you will find the attenuation characteristics and graphics of the ELACIN Compact FlexComfort.

Advantages
